

Moulting season: the first step to success.

The moult is one of the most important but also most difficult periods for your pigeons. In a short space of time, especially when they have been darkened and/or lightened, our pigeon need to fully renew their plumage. For this purpose they need **protein and amino acids** to build **strong feathers** and **fats** to ensure that the feathers are **beautiful, shiny and soft**. We also have to find the ideal balance between all of these nutrients and

sufficient raw fibre, so the pigeons are not too fat, as overweight pigeons do not moult properly.

Well balanced **BEYERS** mixtures and an offer of complementary top quality **BEYERS PLUS Condition & Care** products are tailored to the pigeons' needs in this period.

SUPPORT - CONDITION

AMINO *plus* **N° 10**

Complex of all essential amino acids and vitamins.

- To keep your pigeons in optimal condition.
- An excellent food supplement during the moulting season, when your pigeons will have an increased need for amino acids and, in particular, sulphur containing amino acids, as they are busy growing their new plumage at this time.

Instructions:

- 30 ml / 2 l of drinking water or 1 kg feed
- During racing season: 2 x per week
- During moulting season: 1 x per week

400 ml

RECOVERY - SUPPORT

HERBA PURI-T **N° 20**

A liquid herb tea for pigeons which is dissolved into organic acids and reinforced with minerals and vitamins.

- ensures a strong recuperation subsequent to illness and exhausting flights .
- supports the pigeon's ability to recuperate and contributes to an optimal condition.

Instructions:

- 5 ml / 2 l drinking water
- During racing season: the day after return
- During the spring and moulting season: 7 day cure

500 ml

SUPPORT

MOULTING INTENSIFIER N° 3

Mix of wild seeds and oil-containing seeds.

- To support the moult.
- To build strong and soft feathers.

Instructions:

- 3 kg / 100 kg feed
- During moulting season: provide daily

3 kg

Crude protein	21 %
Crude fat	40 %
Crude fibre	6,3 %
Crude ash	1,4 %

SUPPORT

SUPRA MOULTING

Very easily digestible extruded pellets to support the moult.

- Contains all essential building blocks for a new, supple and soft plumage.
- Contributes to a good metabolism, which ensures that the feathers grow up optimally.
- Contains the ideal ratio of omega 3-6-9 fatty acids.
- Additional lecithin added to promote intestinal absorption of fat and fat-soluble vitamins. Lecithin also has a liver purifying effect.

Instructions:

- 2 kg / 80 kg feed
- During moulting season: provide daily

2 kg

Crude protein	25 %
Crude fat	5 %
Crude fibre	2,5 %
Crude ash	7 %
