# BEYERS CONDITION & CARE

## ENERGY

## GROWTH-ENERGY-MOULTING MIX

A MULTI-FUNCTIONAL SUPPLEMENT FOR REARING OR GIVING A POWER BOOST, WHICH YOU CAN USE THROUGH DIFFERENT SEASONS.

- A balanced nutritional supplement for the mixture, which contains the required extra proteins and fats.
- Contains vitamins, minerals and oligo elements that meet a pigeon's daily requirements.
- You can satisfy seasonal variations in requirements by moistening it with one of our liquid supplements.
- Pigeons are keen to eat it in addition to the daily mixture.
- Provides essential amino acids during moulting and when building up optimal condition in future breeders and racers.
- Makes young birds with the squirts around the nest bowl a thing of the past and ensures that they develop strongly.

Crude protein	17,4 %
Crude fat	14,9 %
Crude fibre	4,7 %
Crude ash	4,3 %

### Instructions:

165 gr / 1 kg feed (or 5 gr/pigeon per day)  
 330 gr / 1 kg feed (or 10 gr/pigeon per day during breeding season (with nestlings)  
 up to 50% of the daily ration

During winter/rest: 2 or 3 x per week combined with mixture.  
 During racing season (> 300 km): upon arrival back home combined with the first feeds and as a dessert after the 3 or 4 last feeds up to basketing.  
 During moulting season: 2 or 3 x per week combined with the moulting mixture, optionally moistened with Amin-Vita or Energy Oil.  
 During breeding season: 2 or 3 x per week combined with the breeding mixture, optionally moistened with Amin-Vita or Energy Oil.  
 Youngsters (after weaning until the start of the racing season): daily, combined with the mixture.
