BEYERS CONDITION & CARE

Our Condition & Care product range, in **addition** to our BEYERS mixtures, consist of a **top quality offer of nutritional supplements, grit- and mineral mixtures and care & hygiene products.**

As with the choice of the most balanced mix, it is the pigeon fancier's responsibility to provide the pigeons with the most suitable nutritional supplements. To make this choice easier for you we have **divided our range not only into supplements, grit and mineral mixes and care & hygiene products**, but also **according to the various seasons** (SPORT, BREEDING, MOULTING, YEAR ROUND) and in line with our sports mixes **into segments**, indicating what these are intended for: **RECOVERY**, **SUPPORT** and **ENERGY**. Our care & hygiene products can be found under the segment icon **CARE**. Below is an overview of all our icons, which are clearly recognisable on our Condition & Care packaging.

CATEGORY ICONS

The category icons are used to clarify the purposes of the different products.

RECOVERY Products to quickly help recover pigeons after heavy efforts.

SUPPORT Products that serve to support pigeons in their daily needs and ensure a build-up in the condition.

ENERGY Products for optimization of (sports) performance to ensure more constant peak moments.

CARE Products developed to ensure that pigeons are not lacking anything in care and hygiene.

SEASONAL ICONS

The seasonal icons have been developed to make clear in which season the products can be used. The icons indicate products for the breeding, moulting and sportseason, or products to keep pigeons healthy throughout the year.

SPORT **BREEDING** **MOULTING** **YEARROUND**
